

Final Plat BOYER FARMS, SECTION 2

CURVE	RADIUS	ARC LENGTH	CHORD LENGTH	CHORD BEARING	DELTA ANGLE
C1	25.00'	23.18'	22.38'	S 34°38'40" W	53°07'48"
C2	50.00'	248.81'	60.80'	N 81°55'14" W	286°16'37"
C3	25.00'	23.18'	22.38'	N 10°29'06" W	53°07'48"

NOTES:

- All easements shown may be used for power, telephone, gas, sanitary sewer, storm sewer, water and surface drainage, as well as the designated use.
- A minimum of five feet along the inside of all side lot lines and ten feet along the inside of all rear lot lines is reserved as a utility and/or drainage easement.
- Bearings and distances take precedence over scale.
- All front and side street setbacks shall be as shown.
- All lot corners are iron pins (new), unless noted otherwise.
- It will be the responsibility of the subdivider or the owner to include the above referenced easements as an integral part of the subdivision in such a manner that said areas will be owned and maintained by the present owner or by a prospective owner.
- Lots 75-83, 91-95, and 99 require soil compaction certification or a soil compaction certification waiver submission to the Montgomery County Building Codes Dept. before building permits will be issued.
- Lots 75 and 98-99 lie within a 100 year flood zone. The minimum crawlspace or basement floor elevation, including all mechanical systems, electrical systems, ductwork, etc., shall be at least one foot above the 100 year base flood elevation of 524.3'.
- Lots 75, 80, 81, 92, 93, and 99 have storm water control structure or structural BMPs that require a Storm Water Maintenance Agreement to be filed with the Montgomery County Register of Deeds and the Montgomery County Building Codes Department before all or any portion of the property is transferred or conveyed.

* Elevation certificates for the following lots are required. A portion of these lots lie within the 100 yr. storm flood easement (Storm frequency). The minimum floor elevation shown shall include basements, all heating and cooling units and ductwork.
Lots: 75, 98-99
Elev. 525.3'

The degree of flood protection required hereon is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or flood heights may be increased by man-made or natural causes, such as bridge openings restricted by debris. This does not imply that areas outside the flood plain district will be free from flooding or flood damages. The approval of this plat shall not create liability on the part of the city/county or any officer or employee thereof for any flood damages that result from reliance on this plat or any administrative decision lawfully made.
